THE STORY

Every career is a story before it's a résumé. This one begins with years of serious preparation for the UPSC civil services and a curiosity about how people, policy and systems work. It moves, chapter by chapter, from HR's fundamentals to leading HR at IG Defence, where Project Delivery and a new MRO vertical have since been added. Each chapter carried something into the next, and that thread is what the timeline below follows.

> *"Policies work when people trust them. Systems work when people own them."*
>
> WHAT I WORK BY

THE JOURNEY

2014 – 2018

Foundations — The Civil Services Years

BA · MA Rural Development · Serious UPSC aspirant

The plan was never HR at first. It was the UPSC civil services, pursued as a serious aspirant. A BA in Economics, Sociology and English Literature and an MA in Rural Development were chosen with that goal in mind, and the preparation meant long hours with polity, governance, economics and public administration: how laws are written, how institutions run, and how policy lands on people. The exam path gave way to HR; the preparation stayed.

Carried forward: the discipline of structured effort, and seeing policy through people.

Dec 2019 – Jan 2024

First Steps — Building Discipline in HR

HR Officer · Tricornio Technologies

HR learned from the ground up: employee records, payroll and statutory documentation, the unglamorous groundwork everything else is built on. Four years of getting the fundamentals right, with zero compliance deviations, earned recognition as Best Employee of the Year, and something more lasting: a reputation for reliability.

Carried forward: reliability, the base everything else stands on.

Jul 2024 – Jul 2025

Scaling Up — From HR to Multi-State Operations

HR Manager & Project Coordinator · Kasper Infrastructure

The scale changed overnight: HR for 600+ employees across multi-state infrastructure projects, with compliance governance raised from 30% to 93%+ ahead of deadline. Coordinating HR and operations for the Mahakumbh 2025 Tent City Project (200 luxury tents, dozens of stakeholders) put HR and live project delivery side by side for the first time.

Carried forward: scale, and a first taste of HR and delivery working as one.

Jul 2025 – Oct 2025

Full Ownership — Running a Plant, End to End

Plant Manager · Kasper Engineering

Full charge of a 60-person plant: HR, administration, security, vendors, housekeeping and discipline under one roof. A short, intense lesson in what it takes to run a complete operation, and the step that took the skill set beyond HR.

Carried forward: end-to-end ownership of an entire operation.

Jan 2026 – Present

A Fast Rise — Where Every Thread Meets

IG Strategic Systems Pvt Ltd (IG Defence, formerly IG Drones) · Noida

Every earlier chapter feeds this one: three step-ups in eight months, each earned on the job.

Jan 2026

HR Associate-II — clearing the backlog

Took charge of compliance and, with the team, closed every outstanding PF, ESIC and NOC matter; then factory HR operations.

Apr 2026

HR Associate-III — the factory's people and premises

First promotion: HR operations, recruitment, factory administration, security and movement, facilities, cafeteria and pantry, and every visit from high-profile delegations to routine ones.

Jun 2026

HR Lead — end to end, factory and corporate

Corporate side added: end-to-end HR and operations, a 12-member team reporting directly (each with their own teams), single point of contact for service-provider vendors, and close support to audit and legal teams.

Aug 2026

Project Delivery, now with MRO — building what comes next

Demos, TEC, trials, on-site delivery, ATP and client training with Business Development. Now expanded to MRO (Maintenance, Repair & Operations): setting up a vertical planned to become a separate, recurring revenue stream.

TURNING POINT

Stepping in where the organisation needed it

On the way to HR Lead, an important production task came up that wasn't part of the role. Stepping in on it, as part of the team that set up the Production & Manufacturing department, led to a different model: a blue-collar workforce, many with little formal technical education, trained for assembly, and engineers focused on testing and quality control instead of basic assembly.

Within weeks the training became a repeatable system: production costs fell sharply with no loss in quality, and that workforce now builds advanced drones. It is also what led to Project Delivery and the MRO vertical.

EDUCATION

2026 MBA, HR & Operations Management
Lovely Professional University

2018 MA, Rural Development
IGNOU

2016 BA, Economics, Sociology & English Literature
