THE STORY

Every career is a story before it's a résumé. This one begins with years of serious preparation for the UPSC civil services and a curiosity about how people, policy and systems work. It moves, chapter by chapter, from HR's fundamentals to leading HR at a defence technology company, where Project Delivery and a new MRO vertical have since been added. None of it was done alone; most of the time, it meant supporting someone else.

THE JOURNEY

2014 – 2018

Foundations — The Civil Services Years

BA · MA Rural Development · Serious UPSC aspirant

The plan was never HR at first. It was the UPSC civil services, pursued as a serious aspirant. A BA in Economics, Sociology and English Literature and an MA in Rural Development were chosen with that goal in mind, and the preparation meant long hours with polity, governance, economics and public administration. The exam path gave way to HR, but the preparation stayed: a discipline for structured effort, a habit of seeing people, policy and systems as one, and an instinct to see the person behind every process.

Dec 2019 – Jan 2024

First Steps — Building Discipline in HR

HR Officer · Tricornio Technologies

Learning HR from the ground up: employee records, payroll and statutory documentation, the unglamorous groundwork everything else is built on. Four years with zero compliance deviations earned recognition as Best Employee of the Year, and something more lasting: a reputation for reliability.

Jul 2024 – Jul 2025

Scaling Up — From HR to Multi-State Operations

HR Manager & Project Coordinator · Kasper Infrastructure

HR across 600+ employees on multi-state infrastructure projects, with compliance governance raised from 30% to 93%+ ahead of deadline. Coordinating HR and operations for the Mahakumbh 2025 Tent City Project (200 luxury tents, dozens of stakeholders) was the first time HR and project delivery sat side by side.

Jul 2025 – Oct 2025

Full Ownership — Running a Plant, End to End

Plant Manager · Kasper Engineering

Full charge of a 60-person plant: HR, administration, security, vendors, housekeeping and discipline under one roof. A compressed lesson in running a complete operation, and the step beyond HR alone.

Jan 2026 – Present

A Fast Rise — Trust Earned in Months

IG Strategic Systems Pvt Ltd (IG Defence, formerly IG Drones) · Greater Noida

Jan 2026

HR Associate-II — clearing the backlog

Took charge of compliance soon after joining and, with the team, closed every outstanding PF, ESIC and NOC matter, then moved into HR operations for the factory.

Apr 2026

HR Associate-III — the factory's people and premises

First promotion: all HR operations and recruitment, factory administration, security and movement protocols, facility management, cafeteria, meals and pantry planning, and arrangements for every visit, from high-profile delegations to routine ones.

Jun 2026

HR Lead — end to end, factory and corporate

The corporate side was added, making the role end-to-end HR and operations management: a 12-member team reporting directly, each with their own execution teams; the single point of contact for a wide network of service-provider vendors; and close support to the audit and legal teams.

Aug 2026

Project Delivery, now with MRO — building what comes next

Additional charge of Project Delivery: working with Business Development on demos, TEC, trials, on-site delivery, ATP and client training. The portfolio has since expanded to MRO (Maintenance, Repair & Operations), with a new MRO vertical being set up within PD, planned to grow into a separate, recurring source of revenue.

TURNING POINT

Stepping in where the organisation needed it

On the way to HR Lead, an important production task came up that wasn't part of the role. Stepping in on it, and then contributing to the setup of the Production & Manufacturing department, led to a different model: instead of hiring highly paid engineers for basic assembly, a blue-collar workforce, many with little formal technical education, was trained for assembly, while engineers focused on testing and quality control.

After a few weeks of adjustment, the training became a repeatable system. Production costs fell sharply with no loss in quality, and that workforce now builds advanced drones. It is also what led to the Project Delivery portfolio, and the MRO vertical now being built.

A team effort throughout: always with support, and often supporting others.

WHAT CONNECTS IT

People first
A sociology and rural-development background shows in how grievances are heard and policies are written: the person in view, not just the process.

Discipline & compliance
UPSC-trained rigour: 100% statutory documentation accuracy, audit-ready records, and compliance raised from 30% to 93%+ ahead of deadline.

Operations at scale
From a 60-person plant to 600+ employees to a combined HR, delivery and MRO portfolio, each chapter added scale.

Curiosity
Chess, coding and AI in HR feed the same instinct behind HRMS rollouts, Lean Six Sigma thinking and automation.
